

NUMBER ANAGRAM GAME

Use this list for the number anagram game. Distribute the number cards one to each student. Make as many sets as needed so each team/group has one set. If there is an odd number of students, one student can hold two. If you don't have enough students for two teams, you can remove some of the numbers just remember to omit the numbers from the list below that contain the numbers you removed.

Another variation that you can do if you have very few students, is to lay the numbers out on opposite sides of the room and have 2 students compete at a time by grabbing the correct numbers and placing them in the correct order at the front of the room.
